

Fire Risk Assessment

Designed for participants to fulfil the statutory requirements of the new legislation (RRFSO) and also teaching participants how to prepare an appropriate fire safety risk assessment in the workplace.

The course includes:

- The theory of risk assessment
- Practical and workshop exercises to consider workplace fire safety issues and actions that may be required

Upon successful completion of the course participants will receive a certificate of achievement and a fire risk assessment template.

Duration: 3.5 hours

Equipment: Training materials supplied
