

Fire Safety Manager

Participants will receive a combination of the Fire Warden and the Fire Safety Risk Assessment courses, to provide those responsible for fire safety management with a sound understanding of these important fire safety requirements.

The course includes:

- Workshop with participants to identify fire risks and potential fire hazards
- Presentation on legal responsibilities
- Discussion and focus on the seriousness and consequence of fire
- Training on fire warden duties and checks
- Presentation on the theory of fire
- Instruction on the use of fire extinguishers and fire equipment
- Theory and practical exercises in risk assessment.

Upon successful completion of the course participants will receive a certificate of achievement, Fire Warden's handbook and a risk assessment template.

Duration: 1 day

Equipment: Supplied at extra cost
Lunch and refreshments included
