

Health and Safety Awareness for Managers

This course is designed to introduce managers to their responsibilities for health and safety and to provide them with the basic awareness required to effectively discharge daily duties and to deal with issues when they arise.

The course includes:

- Concepts of health and safety
- Health and safety law
- Workplace accidents and ill health prevention
- Accident investigation
- Risk assessment

Upon successful completion of the course participants will receive a certificate.

Duration: 1 day

Equipment: None
